

PROGRAMS AVAILABLE

Dental Hygiene

Two-year Associate Degree of Science program preparing students to provide oral care and perform routine dental procedures in a dental office.

Associate Degree Nursing (ADN)

Two-year Associate Degree of Science program preparing students to function as registered nurses in a variety of health care settings.

Vocational Nursing (LVN)

18-month program licensure program preparing the student to provide nursing care under the direction of a physician or registered nurse.

Nurse Aide/Home Health Aide (CNA)

One-semester certification program preparing the student to provide basic health care in a variety of health care settings.

HEALTHCARE CAREER OPTIONS FOR FLEXIBILITY AND STABILITY

Our Health Sciences programs offer the most innovative approaches to nursing and dental hygiene education, including clinical simulation with interactive high fidelity mannequins, online education, and paperless and electronic documentation of patient care. All programs have state of the art simulation lab settings for learning and practicing skills prior to actual clinical experiences in local health care facilities. The Dental Hygiene program also operates its own clinic for dental hygiene services for community members at low cost.

The Associate Degree Nursing, Vocational Nursing, and Nursing Assistant/Home Health Aide programs are current with California State Board approvals and graduates are eligible to take state certification and licensure examinations to practice at their respective levels in the State of California. The Dental Hygiene program is fully accredited by the American Dental Association Commission on Dental Accreditation.

A Great Place to Start
